

11F evidence audit: projection-associated support layer

Full RDS rescan; transcriptomic module support only; no anatomical projection claim.

Allowed interpretation

- Projection-associated transcriptomic support
- Molecular competence / axon-guidance module evidence
- A9/A10-like functional identity support
- Downstream 11H integration only as conservative evidence

Prohibited interpretation

- True anatomical projection validation
- Host integration confirmed
- Functional projection proven
- Retrograde tracing-confirmed graft integration

Decision: PROJECTION_MODULE_PROXY_ROWS_RESCUED_AND_DEDUPED_FOR_11H
