

Main figure legend map

Five main figures are captioned using assembly-ready 12F sources.

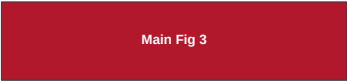

Source-traceable transcriptomic prioritisation framework

panels: 4 | role: Framework and source traceability

Core weak-label prioritisation and DA/graft-related identity evidence

panels: 4 | role: Core prioritisation

Temporal maturation and module co-variation across transcriptomic stat

panels: 4 | role: Temporal/module support

External and proxy evidence layers with risk-context boundaries

panels: 4 | role: External/proxy boundary support

Integrated umbrella evidence tier and weak-label machine-learning audi

panels: 4 | role: Integrated evidence and ML audit
