

SafeHarbor/control loci excluded from CRISPR candidate count

Control loci are retained for audit but not treated as biological proxy candidate genes.

Control_locus	Metric_sources	Mean_effect	Median_effect	Max_abs_effect
SafeHarborchr9	4	−0.0791	−0.0366	0.2638
SafeHarborchr4	4	−0.1078	−0.1009	0.1853
SafeHarborchr11	4	0.0517	0.0340	0.1299

This panel documents why SafeHarbor/control loci are excluded from biological candidate counts.
